

The Meeting Notetaker and AI Copilot Landscape

With AI notetakers and copilots on the rise, it's helpful to understand how different tools approach features and functionality. This snapshot offers a side-by-side look at the current ecosystem of meeting notetakers and enterprise search tools.

Use this guide to find the right fit for your team or business.

Category	Description	Good for
Generalized notetakers	Lightweight tools for meeting notetaking, often team-agnostic	Meetings only. Product strengths focus on meeting notetaking and connected action items only
Sales-focused notetakers	Tools optimized for revenue teams, pipeline tracking, CRM sync	Sellers and sales leaders. Most often used for sales teams to optimize their pitch and delivery.
Platform notetakers	Meeting support tied to the largest platforms	One-platform shops. Groups that work in a single environment to collaborate, or only require quick notes.
Niche and new notetakers	Just-launched notetaking tools from adjacent AI players	Private use. Individuals and small teams that keep recordings and notes for themselves.
Enterprise search platforms	Independent search tooling that connects disparate content and data	Advanced needs. Find answers in massive datasets, and build agentic fleets of digital workers.
Read AI	Industry-leading meeting notetaker and AI copilot that takes notes, answers questions about your data, and proactively recommends next steps.	Enterprises and teams of any size ready to see value immediately. No setup, no learning curve, and at an accessible price point.

Evaluating the Meeting Notetaker Landscape

Key	Read AI	Generalized notetakers	Sales-focused notetakers	Platform notetakers	Niche and new notetakers
✓ = strong native support ● = limited functionality ✗ = not available or extremely limited

Recommendations, coaching, and insights across channels	✓	●	●	●	✗
Custom templates	✗	✓	✓	●	✓
Robust admin controls	✓	✓	✓	✓	●
Enterprise-level privacy and security	✓	✓	✓	✓	✗
Simple setup	✓	✓	●	✗	●
Voice agent	✗	✓	✗	✗	✗
AI-enabled manual notes	✗	✗	✗	✗	✓
Per person enterprise licenses for less than \$25 a month	✓	✓	✓	✗	✓

Evaluating the Enterprise Search Landscape

Key	Read AI	Enterprise search platforms
✓ = strong native support ● = limited functionality ✗ = not available or extremely limited		
Enterprise search	✓	✓
Native integrations	✓	✗
25+ integrations	✗	✓
Agentic AI deployment	●	✓
AI-powered transcription, summaries, action items	✓	✗
Recommendations, coaching, and insights across channels	✓	✗
Robust admin controls	✓	✓
Enterprise-level privacy and security	✓	✓
Simple setup	✓	✗
Executive-led implementation	●	✓
Per person enterprise licenses for less than \$25 a month	✓	✗

Key Takeaways:

- Cut meeting time and busywork:** Teams using Read AI attend 20% fewer meetings and save 20+ hours per month per person through meeting notetaking, copilot support, and enterprise search.
- Instant AI, zero setup:** Read AI is plug-and-play. No training, no configuration, just immediate value.
- Works where you work:** Native integrations across your existing tools—Meet, Zoom, Slack, Teams, email, and more—create an unlimited context window.
- Automates your entire workflow:** Read AI connects meetings, messages, calendars, CRM, pdfs, and docs with just a few clicks, turning insights into action automatically.

Don't Just Take It From Us

“I tell people all the time, if you don’t have Read AI, you’re losing out.”

Lauren G., director of strategic communications, Nitrogen PR

“It learns me—and it’s starting to think like I do.”

Tony R, IT Sales Executive, Particle41

“Read AI isn’t just keeping pace with the AI-driven workplace—it’s actively attempting to shape its future.”
